PRE-FAB STEEL BUNK HOUSES PORTABLE ROOMS & CABINS

WE HELP
CREATE
SPACE[®]

niko

The NIKO Prefab Building systems: is a complete answer to your space problem. We supply accommodation in all shapes and sizes. Our role is to solve the unique requirements of all our customers as quickly and cost effectively as possible. We set new standards in the relocatable and permanent building.

Our Motives are:

- We offer professional installation anywhere and guarantee your satisfaction.
- Our efficiency allow to keep part of your project cost minimum with our innovative.
- We hope our product knowledge would provide us an opportunity to serve you in the future.

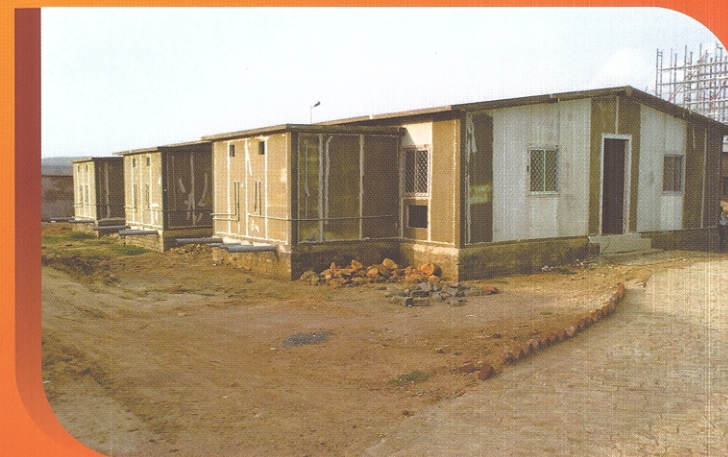

NIKO Prefab Building System: Provide to you a complete range of panel system. It provides rapid, construction of a fully modular building that can be used almost anywhere. It consists of a series of Panels and Connectors, which interlink to form both interior and exterior walls as well as roofs. The components are made of specially formulated composite resins that the NIKO PREFAB has developed for the application.

The NIKO PREFAB Building System: Can be erected on a concrete floor slab in which connector studs have been embedded or constructed on a tubular frame of grid 2'x2' made up of steel tubes anchored with section of 4" to 1 1/2 ft. the structure from the ground level. The skid-mounted grid is covered by 18mm plywood screwed into the modular frame and covered by vinyl flooring of 1.5 mm to 2 mm as per client's choice.

Walls and roof panels are made of GI sheet of minimum 0.50mm thickness on both sides and 75 mm thick EPS (Expanded Polystyrene) of density 18kg/cum sandwiched between the two sheets as illustrated below for heat insulation.

Doors and windows can be placed in any desired location in the wall. Factory made flush doors and M.S. Steel framed and aluminum windows are provided. The panel system is based on C.K.D. (complete knock down) system which means that once installed the complete structure can be relocated elsewhere with in short notice without loss of any key material used. The entire structure can also be redesigned in dimension at any time after installation.

The NIKO PREFAB building system: Has been designed for use in developing countries having a great need of economically housing and easily transportable. A four person crew can erect the system within four hours. It is high quality throughout, yet economical enough to make ownership easy and accessible to most people.

bunk houses / containers

The Composite Materials resist deterioration from:- • heat • humidity • ultra Violet Radiation • Rust • Rot and • vermin infestation, making The NIKO PREFAB Building System is ideal for Tropical & Subtropical location. It is also suitable for very cold climates due to insulation material of high K-value.

Fully erected and anchored, it becomes quite apparent that the unique design configuration of The NIKO PREFAB Building System will, enable it to withstand hurricane force, winds and the seismic shock of earthquakes.

Panel Stability:

Panel from a composite well-bounded system of seven layers comprising of the following:-

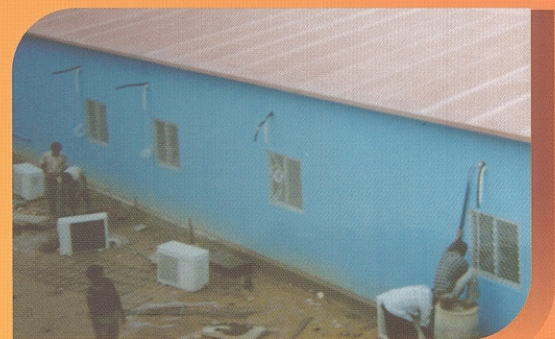

1. Protection layer of Poly Resin with sand finish.
2. Galvanised metal sheet walling.
3. Resin bonding layer.
4. Medium density thermocole.
5. Resin bonding layer
6. Galvanized metal sheet walling
7. Protection layer of poly resin with sand finish.

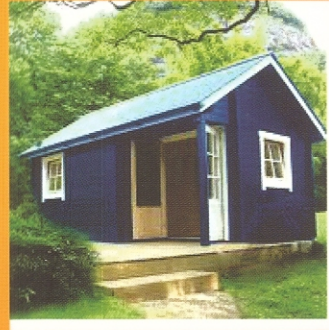

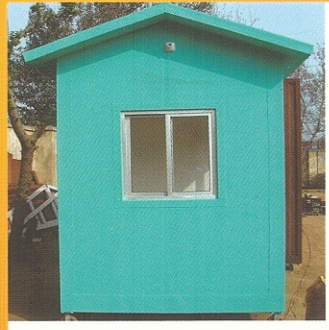

Key features:

- Simple Construction
- Rust Resistant
- Rapid Assembly
- Insulate roof and walls
- Expandable Building design
- Any Type/Quality of Interior Finish
- Ultra violet Resists
- Long Life
- Rot Resistant
- Super Strong Design
- Resistant to wind, floods, Earth quake.
- Resists Abuse and abrasion
- Resists Vermin infestation

You can use NIKO PREFEB units for:-

- Cottages
- Offices
- Clinic
- Restaurants
- Toilet Rooms
- Farm Houses
- Houses
- Schools
- Guard-room
- Barracks
- Site Huts
- Lecture Halls
- Beach & Resorts
- Ticket House
